SUPPORTING PRIORITIES (#2 – #4)

Supporting optimizations to expand service discoverability, customer review velocity, and website clarity.

02

Enrich Google Business Profile Secondary Categories and Seasonal Services

HIGH PRIORITY
PRIORITY

WHAT WAS FOUND & WHY IT MATTERS

The Google Business Profile lists 6 core services under HVAC contractor, whereas top local competitor Hamstra Heating & Cooling lists 16 comprehensive service areas including Heat Pump Installation and Duct Sealing.

Adding explicit secondary categories increases keyword relevancy for high-intent homeowner searches like "emergency AC repair Tucson" and "furnace tune up 85712".

RECOMMENDED ACTION

Add secondary GBP categories including Air Duct Cleaning Service, Furnace Repair Service, and Emergency HVAC Contractor.

03

Accelerate Direct Google Review Capture via Automated Post-Service Workflows

MEDIUM PRIORITY
PRIORITY

WHAT WAS FOUND & WHY IT MATTERS

Top Care Air maintains an exceptional 4.9-star rating across an established footprint of 200+ customer reviews on public platforms. However, capturing direct, steady review velocity on Google Maps remains essential to maintain local 3-pack prominence against larger legacy competitors.

In emergency HVAC searches during peak summer heat, Google heavily weighs continuous review velocity and recency when ranking businesses in the local 3-pack.

RECOMMENDED ACTION

Integrate automated SMS review requests into HouseCall Pro after each completed service dispatch to maintain steady review velocity.

04

Embed LocalBusiness HVAC Schema and Optimize Emergency Booking on topcareairaz.com

MEDIUM PRIORITY
PRIORITY

WHAT WAS FOUND & WHY IT MATTERS

The website topcareairaz.com is fast, responsive, and includes HouseCall Pro booking, but lacks structured HVACBusiness JSON-LD schema markup with service area geocoding.

Structured HVACBusiness schema directly communicates service radius and emergency availability to search engine crawlers, improving local snippet visibility.

RECOMMENDED ACTION

Add structured HVACBusiness JSON-LD schema markup including geo-coordinates, 24/7 operating hours, and service radius details.
